Summary

My name is Juriaan Wolters, Visual Effects Artist, currently residing in Amsterdam.

I have a wide variety of skills for working in compositing. I am all-round educated in compositing tools and techniques, and I find the most joy in working with Nuke. I am always keen to learn more about the art and skills of compositing and every aspect of VFX. I like to find inventive solutions for problems which need a creative and technical eye to solve. Also, I like making choices about how to precisely achieve a goal the best way with all the available tools. Working on a product as a team brings out the best in me: I like sharing knowledge, I am an enthusiast and positive team member with a big sense of humor. I am used to working with deadlines and I am an easy communicator on all levels.

Currently I am working remotely as a freelancer in Amsterdam. Are you curious to watch my showreel? Please send me a direct message and I will provide you with the password.
